

SUCCESS STORY

Project type: Replacement of aggregate screening machine

Company: Quarry

An SME produces aggregate for the civil construction industry. The company management decided to use a PolSEFF loan to modernise its production line by replacing an old aggregate screening machine (which screens crushed rock in desired grain sizes).

The new machine will allow for an increase in production capacity by 100%, and for a 21% decrease in diesel fuel consumption. After the project's completion, the company will receive an investment incentive of 10% of the loan amount.

The Company

Main activities	Production of aggregate; construction of roads.
Project location	Jaryszów, Poland

Project goals and main investment

Main investment	Installation of a new aggregate screening machine.
Project goals	To modernise aggregate production.
Investment size	€274,654

Expected results

Operational results	<ul style="list-style-type: none">- Annual diesel fuel saving of 10,513kg- Annual CO2 emissions decrease of 33.4 tonnes
Financial results	<ul style="list-style-type: none">- Simple payback period of 1 year
