

## SUCCESS STORY

**Project type:** Biomass burner investment

**Company:** Fuel Wholesaler

In response to growing demand for biofuels, a Warsaw-based company started to produce briquettes, pellets, firewood and kindling. The company is decided to use a PolSEFF loan to invest in a biomass boiler to produce high-quality renewable energy. The new systems will allow the company to save up to 3,000 MWh/year and to decrease annual CO<sub>2</sub> emissions by 1,000 tonnes.

### The Company

<b>Main activities</b>	Wholesale of solid, liquid and gaseous fuels and related products
<b>Project location</b>	Byczyna, Poland

### Project goals and main investment

<b>Main investment</b>	Installation of a new EKOMAT 950 biomass boiler.
<b>Project goals</b>	To invest in renewable energy production systems.
<b>Investment size</b>	€51,400

### Expected results

<b>Operational results</b>	- Annual primary energy savings of 3,000 MWh.
<b>Financial results</b>	- Investment incentive of 10% of the financing value.
